TISSUE

Today's Research. Tomorrow's Medicine.

ABOUT US

The GSC's CAP, DAP and ISO 27001 certified technology platform is a high-throughput, large-scale DNA and RNA sequencing and analysis facility that has been designed to maximize analytical capacity, diversity, efficiency, scalability and flexibility. Our state-of-the-art clinical, sequencing, bioinformatics and proteomics platforms are ready to be put to use for your research or clinic.

We partner with researchers, guide experimental design, execute high quality processing of complex and valuable biological samples and provide extensive bioinformatics analyses with the aim of making genomics research accessible to our partners and collaborators within the scientific community.

Please feel free to [contact us](#) if you have any questions about the services we provide.

| ABOUT THIS GUIDE

This user guide is for the preparation and submission of **tissue**. If you are submitting a different sample type, please refer to the other user guides on [our website](#).

1 SAMPLE PREPARATION

SUBMITTING SAMPLES FOR TOTAL NUCLEIC ACID (TNA) EXTRACTION

We accept a variety of samples for TNA extraction and sequencing at the GSC including blood, fresh frozen tissues, formalin-fixed paraffin-embedded (FFPE) tissues, saliva and buccal (cheek) swabs. Cell samples are accepted in tube format. Tissue samples should be shipped frozen on dry ice (-80°C). Blood or saliva samples can be submitted at ambient temperature according to instructions on the collection tubes.

This user guide will focus on fresh frozen tissue submissions.

The following tissue starting material guidelines work well for human and mouse samples. If working with other organisms, please [contact us](#).

SAMPLE TYPE	SUBMISSION REQUIREMENTS
Fresh Frozen Tissue in OCT	<ul style="list-style-type: none"> All samples must be frozen at -80°C Sections: 50 µm x 10 mm x 1 mm, minimum of 4 sections supplied in 1.5 mL Eppendorf tubes
Human/Animal Tissue	<ul style="list-style-type: none"> Fresh tissue must be snap frozen in liquid nitrogen right after harvesting and stored at -80°C Frozen sample should be shipped on dry ice; any freeze thaw cycles should be avoided Please submit at least 100 mg of soft tissue that is minced by indicating the actual weight in mg For potentially contaminated tissue such as intestine, please ensure guts are cleared out
Skin Punch	<ul style="list-style-type: none"> One 3-4 mm skin punch, snap frozen or OCT-embedded.

ONLINE SAMPLE SUBMISSION

The online submission form must be completed and approved prior to submitting your samples to the GSC.

Our “Online Submissions Webpage” can be found [here](#). Please use Firefox or Google Chrome browsers.

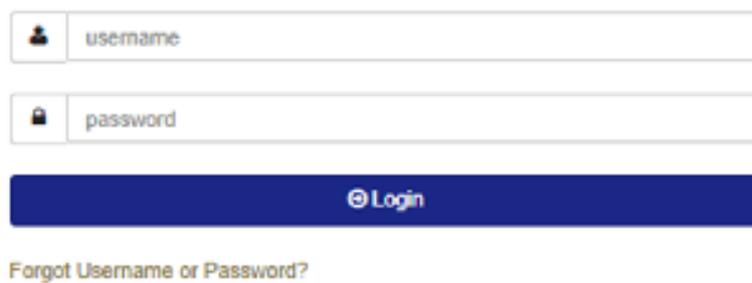

This guide to online submissions will provide helpful information that will assist you in navigating our online submission website.

Please write to GSC_submissions@bcgsc.ca if you have any questions.

GETTING STARTED

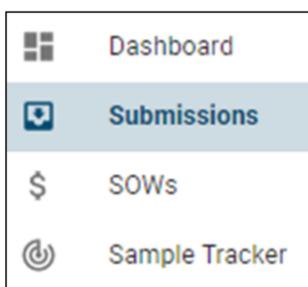

1. You can access the GSC Sample Submission Interface by entering the link below in Firefox or Google Chrome: <https://www.bcgsc.ca/samplesubmissions>
2. Enter your username and password, and then click Login:

GSC Sample Submission Interface

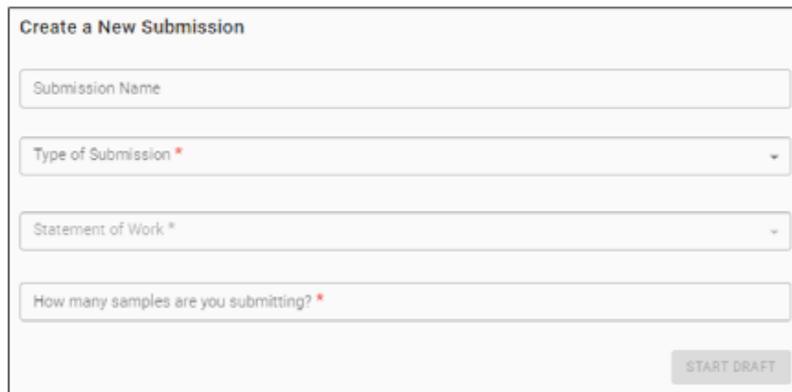

The screenshot shows a login form with two input fields: 'username' and 'password'. Below the fields is a blue 'Login' button. A link for 'Forgot Username or Password?' is located below the button.

3. To start a new submission, click Dashboard or Submissions on the left side panel:

- Click the  (Dashboard) icon on the left side panel, and then click "START NEW SUBMISSION" under Quick Links, or
- Click the  (Submissions) icon on the left side panel, and then click "CREATE NEW SUBMISSION" located on the top right corner.

HOW TO CREATE A NEW SAMPLE SUBMISSION

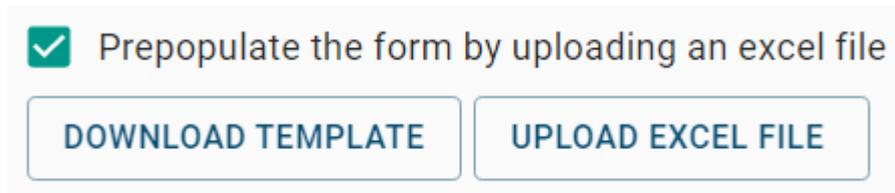

The screenshot shows a web form titled "Create a New Submission". It contains the following fields from top to bottom: a text input for "Submission Name"; a dropdown menu for "Type of Submission *"; a dropdown menu for "Statement of Work *"; and a text input for "How many samples are you submitting? *". A "START DRAFT" button is positioned at the bottom right of the form area.

1. Submission Name: This is an optional field to help you identify your submission. Create a submission name that is complex enough to easily and uniquely identify each submission.
2. Type of Submission: Select from the drop-down menu. Only one sample type is allowed per submission.
3. Statement of Work: Select from the drop-down menu. Once selected, PI, Dissemination Recipient(s), and Scope of Work will be displayed. To make any changes to this information, please contact SOW@bcgsc.ca.
4. Sample Number: Enter the number of samples you are submitting. Unless otherwise instructed, samples must be submitted in 1.5 mL Eppendorf tubes.
5. Taxonomy: You may enter multiple Taxonomy IDs per submission. Search for the taxa of your samples by typing NCBI Taxonomy ID (e.g., 9606) or name (e.g., human). Only selected Taxonomy IDs will be available later in the "SAMPLE INFORMATION" section under the Taxonomy field.
6. Sample Options: Select all that apply to your samples (Cell Lines and/or Xenograft). For these sample types, there will be additional fields to complete.

7. Prepopulate the form by uploading an Excel file: Advanced users (i.e., those who often use the GSC Sample Submission Interface) have an option to prepopulate the sample information form by uploading an Excel file. This is not recommended for first time submitters.

- Click the checkbox next to Prepopulate the form by uploading an Excel file:

A screenshot of a user interface showing a checked checkbox next to the text "Prepopulate the form by uploading an excel file". Below this text are two buttons: "DOWNLOAD TEMPLATE" and "UPLOAD EXCEL FILE".

- Click "DOWNLOAD TEMPLATE".
- Enter your sample information directly into the Excel file that is generated:
 - » You can copy and paste entries from a pre-existing Excel file that contains your sample information;
 - » If a field has a drop-down menu, you must select from the available options;
 - » Some fields may require validation after the sample information form has been populated;
 - » All fields do not need to be completed in order to use this feature to prepopulate the sample information form; and
 - » Any missing or invalid fields can be corrected within the actual sample information form.
- Once completed, save the Excel file on your computer.
- Go back to the "Create a New Submission" section and click "UPLOAD EXCEL FILE".
- A dialogue window will open that allows you to navigate to the location on your computer where you saved the Excel file.
- The "SAMPLE INFORMATION" section will be auto-populated based on the entries in the Excel file.

-
8. Unused Sample: Indicate what you want us to do with any unused samples upon completion of your project. If you select “Destroy unused sample”, we will discard your samples six months following data dissemination.
 9. Click “START DRAFT” on the bottom right corner.
 10. You can always go back to the “SET UP” section to edit the above fields:

SET UP ✓ SAMPLE INFORMATION * WORK REQUESTS * WORK REQUEST ASSIGNMENT * COMMENTS

SAMPLE INFORMATION FORM

Overview

1. Mandatory fields are denoted by *. Certain field selections will grey out mandatory fields. In these situations, field entry is not required. For example, if Tissue Disease Status is “Normal,” Pathology will be greyed out, so you do not need to provide this information.

2. For additional information on any given field, click the  icon next to the column heading:

Sample ID* 	Tube Label* 
--	---

3. There are tools on the top right corner to help you complete each field more conveniently:

PASTE RANGE	FILL DOWN	CLEAR COLUMN
-------------	-----------	--------------

- **Paste Range:** This option can be helpful when you have a pre-existing Excel file that you would like to copy and paste line items from. For the fields without drop-down menu, you can copy and paste directly into the form from your Excel file without using this tool.
- **Fill Down:** This option can be helpful when you have several consecutive rows that will contain the same value.
- **Clear Column:** This option can be helpful when you would like to reset values in the entire column.

-
4. Validator will give an orange warning message for any entries that we want you to double-check. If the information looks correct, you can proceed. You will receive a red error message when the entry is missing or incorrect. These entries must be corrected before you can submit your sample information form:

5. You can download the Excel file of your submission by clicking the “Download” icon next to the Submission ID:

Submission	Name
 847	Download Excel

Sample Information

1. Sample ID: This field is a unique identifier referring to the actual sample being submitted; you will receive your data back linked to Sample ID.

Sample ID Requirements

- Between five and 80 characters with no symbols and no spaces (hyphen & underscore are allowed);
 - Sufficiently complex to help distinguish your samples from other samples; and
 - If submitting two or more identical samples, indicate that they are identical by using the same Sample ID.
2. Tube Label: Enter "Tube Label" as it is written on the tube; can be the same as the Sample ID.

Tube Label Requirements

- Less than 13 characters with no symbols (hyphen & underscore are allowed); and
 - All labels must be unique to differentiate between tubes.
3. Taxonomy ID: Auto-filled from the "SET UP" section.
 4. Tissue Fixation Process: This is a type-ahead input field; begin typing and a list of suggestions will appear for selection. If necessary, you may enter free text. For fresh frozen tissue samples, enter "None".
 5. Alternate Sample ID: This field is an optional identifier. The Alternate Sample ID must contain no symbols or spaces (hyphen & underscore are allowed) and be sufficiently complex to help distinguish your samples from other samples.

6. Patient ID: This is used as a common identifier in our database to link all samples received from the same patient; this assists with our QC processes as well as downstream analysis.

Patient ID Requirements

- A minimum of five characters with no symbols and no spaces (hyphen & underscore are allowed);
- Sufficiently complex to avoid unrelated individuals from having the same ID;
- De-identified; do not use hospital ID or PHN which may link back to the patient or patient records; and
- If two or more samples are from the same patient, they must have the same Anonymous Patient ID; do not add a prefix or suffix to differentiate normal/tumour pairs or different aliquots of the same sample.

7. Participant Study ID: This is an optional field.

8. Family Information: If applicable, enter any relevant family information such as a family history of disease or specific family relationship to other samples being submitted (e.g., proband, father, mother, sibling).

9. Developmental Stage: Enter the developmental stage of the sample being submitted (e.g., larvae, embryo, adult, pediatric).

10. Sex: Select from the drop-down menu. This information is helpful for QC processes and downstream analysis.

11. Collection Date: Enter the date that your sample was collected using the calendar (e.g., date of patient blood draw or date that a sample was collected in the field). The date must be in the YYYY-MM-DD format (e.g., 2022-01-24).

12. Anatomic Site: Enter the site from which the sample you are submitting was derived (e.g., brain, liver). This is a type-ahead input field; begin typing the anatomic site and a list of suggestions will appear for selection. If necessary, you may enter free text.

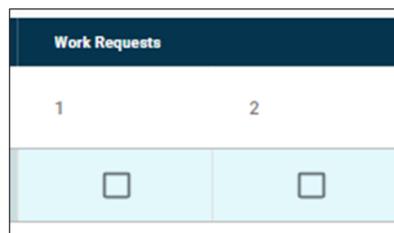

13. Tissue Disease Status: Select from the drop-down menu.

14. Disease Status of Patient (for Normal Samples): Enter the disease/health status of the patient. This information can help us track the disease status of the patient separately from the sample. For example, if you are submitting a normal skin sample from a patient with leukemia, the sample is normal but the disease/health status of the patient is "Leukemia".
15. Tissue Type: For diseased samples, select from the drop-down menu. Select "Benign" for benign tumour and "Non-neoplastic disease" if not cancer.
16. Cell Type: If a specific cell type has been used, specify the cell type. For example, if B-cells were sorted from lymph node, Anatomic Site would be "Lymph node" and Cell Type would be "B-cells." This is a type-ahead input field; begin typing the cell type and a list of suggestions will appear for selection. If necessary, you may enter free text. An orange warning message will display, but you can still proceed.
17. Collection Method: Enter the method used to collect the tissue (e.g., flash frozen, fresh frozen and embedded in OCT).
18. Amount of Tissue (mg): Enter the amount of tissue being submitted in mg (100 mg to 1000 mg). **Do not enter the unit.** Prior to preparing your samples, review the "[Frequently Asked Questions](#)" web page to ensure that your samples meet the requirements.
19. Pathology: This is a type-ahead input field; begin typing the disease name. A list of suggestions will appear for selection. The list is generated from [Disease Ontology](#). If there are no appropriate matching selections, you may enter free text. **Do not use abbreviations.** An orange warning message will display, but you can still proceed.
20. Additional Pathology Info: For diseased samples, if applicable, enter pathology subtype/subgroup information such as molecular subgroup.
21. Pathology Occurrence: For tumour samples, select from the drop-down menu.
22. Pathology Grade: For tumour samples, if known, enter grade (e.g., G1, G2, G3, G4, Low, High).

-
23. Pathology Stage: For tumour samples, if known, enter stage by selecting from the drop-down menu.
 24. Tumour Content (%): For tumour samples, enter percent tumour content of the sample, if known. It must be a specific number; please do not enter a range.
 25. Treatment Status: Select treatment status at the time your sample was collected from the drop-down menu.

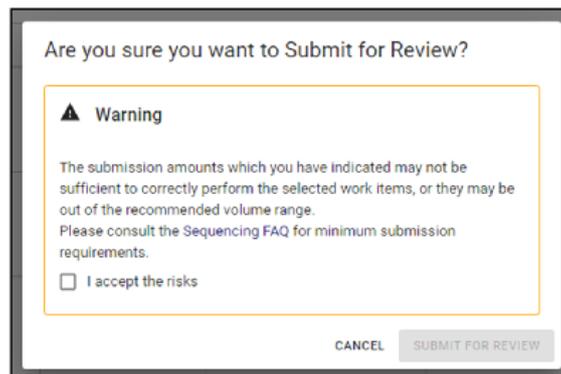

WORK REQUESTS & WORK REQUEST ASSIGNMENT

1. Please refer to your SOW to obtain the work request information that will be required in this section.
2. If the samples you are submitting have different library protocols and/or sequencing goals, you will need to click “ADD WORK REQUEST” on the top left corner to be able to enter different work requests for each sample.
3. Once the “WORK REQUESTS” section has been completed, you will need to assign one of the work requests to each sample in the “WORK REQUEST ASSIGNMENT” section.
4. Assign a work request to each sample by clicking the checkbox under the appropriate “Work Requests” column:

Work Requests	
1	2
<input type="checkbox"/>	<input type="checkbox"/>

- You can edit work request details by going back to the “WORK REQUESTS” section.
 - If the same work request should be applied to all the samples, simply click the first checkbox, then click “FILL DOWN” on the top right corner.
5. The required amount of tissue is validated based on the library protocol selected. If you are submitting less than the minimum amounts, you will be asked to accept the risks of failure before you can submit your sample information form for review:

Are you sure you want to Submit for Review?

Warning

The submission amounts which you have indicated may not be sufficient to correctly perform the selected work items, or they may be out of the recommended volume range. Please consult the Sequencing FAQ for minimum submission requirements.

I accept the risks

CANCEL SUBMIT FOR REVIEW

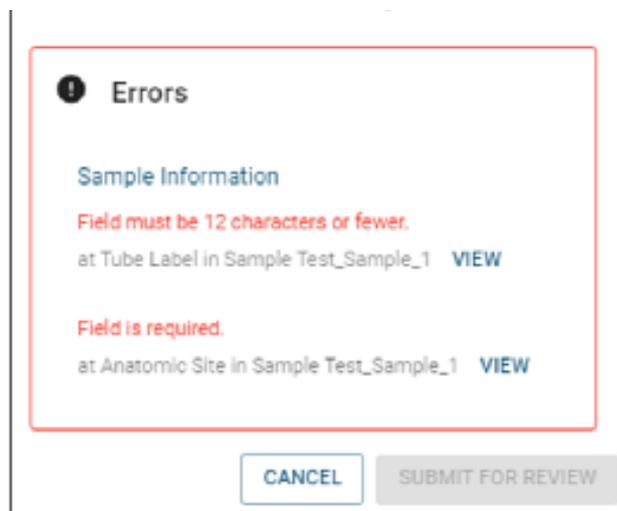

COMMENTS & PLATE INFORMATION

1. Use the "COMMENTS" section to:

- Enter any additional comments regarding your work request, such as specific pooling strategy, should any clarifying information be required; and
- Provide any extra information or details regarding your submission or samples.

SUBMITTING THE SAMPLE INFORMATION FORM

1. Once you have reviewed all the fields and are satisfied with the sample information form, click “SUBMIT FOR REVIEW” on the top right corner.
2. If any of the samples do not meet the minimum recommended amount, click on the “I accept the risks” checkbox in order to proceed.
3. If there are any errors that need to be addressed, you will see the following message:

Click “VIEW” and you will be taken directly to the cell whose error must be fixed before submitting.

4. Once your sample information form has been successfully submitted, you will receive “Sample Information Form Received for Review” email notification.

AFTER SUBMITTING SAMPLE INFORMATION FORM FOR REVIEW

1. Your sample information form will be reviewed for completeness and accuracy. You will then receive “Edits Requested” or “Submission Approved” email notification.

For “Edits Requested”:

- In order to resubmit the form, you must confirm or amend all of the fields which have been highlighted yellow or orange by the reviewer. As you address each field in the form, its colour will change to green or blue. When there are no more yellow or orange fields left, you can resubmit;
- Some fields may also contain a comment made by the reviewer, in which case those fields will be marked with a small red triangle. You can hover your mouse over those fields to see the reviewer comments; and
- You also have the option of making edits to any field, including those which have not been highlighted by the reviewer. Any such fields will become highlighted purple, and are subject to final review by the GSC Submission team.

Below is a legend of the highlighting colours you may encounter while making edits:

- » **Yellow:** Needs Attention—the reviewer believes an edit may be required.
- » **Orange:** Changed by Reviewer—the reviewer has already changed the value of this field, and would like you to confirm (or re-edit). Hover over the field with your mouse to see the change that has been made.
- » **Blue:** Amended by Submitter—to be reviewed by the GSC Submission team.
- » **Green:** Confirmed by Submitter—subject to final review by the GSC Submission team.
- » **Purple:** Additional Edit by Submitter—subject to final review by the GSC Submission team.

You should use the following three modes (“Edit”, “Highlight”, and “Read-only”) when addressing reviewer comments and changes:

- »  **Edit:** This is the default mode. When in ‘Edit’ mode, you are able to alter any field to change its value. Whenever you have made an edit to a field, it will turn blue or purple.
 - »  **Highlight:** When you switch to ‘Highlight’ mode, clicking on a field should turn it green. You may highlight a field green to indicate that you agree with an edit made by the reviewer, or that you believe the highlighted field already has the correct value (clicking on a field multiple times while in highlight mode will toggle between ‘unconfirmed’ and ‘confirmed’ state).
 - »  **Read-only:** All error and warning messages will be hidden.
2. Once your submission has been approved, you will receive a “Submission Approved” email notification with detailed instructions for dropping off or shipping your samples.

3

SAMPLE SUBMISSION BY COURIER

Once the sample submission form is approved, samples should be shipped on dry ice and addressed to:

Dr. Andrew Mungall - Biospecimen Core, Room 508
Genome Sciences Centre BC Cancer
Suite 100 - 570 West 7th Avenue
Vancouver, BC Canada
V5Z 4S6 (*If shipping via Purolator, use V5Z 1B3)

email: amungall@bcgsc.ca

Tel: 604-707-5900 ext 675411

When samples have been shipped, we ask that you please email sampleshipments@bcgsc.ca to notify us of your shipment and the associated tracking number so we can monitor the progress during transit.

If shipping on dry ice, please ensure that there is sufficient dry ice for a couple of days. We recommend shipping Monday to Wednesday as we cannot accept packages on weekends.

4 SAMPLE DROP-OFF

The sample submission form must be reviewed and approved by GSC personnel prior to submitting samples to the GSC.

Regular hours for sample drop-off and plate pick-up:

Monday – Friday: 9:30-11:30 am and 1:30-3:30 pm

Location:

Suite 100-570 West 7th Avenue, Vancouver, BC V5Z 4S6

To enter the building, dial #100 on the intercom and the receptionist will let you in. The reception is on the ground floor (past the elevators and on the left). Go through to reception and ask the receptionist to call or page anyone from the Biospecimen Core group. We'll come down to reception to meet you.
